Welcome to DialogLink - Version 5

Revolutionize the Way You Work!

New on Dialog

Order Patent and Trademark File Histories Through Dialog

Thomson File Histories are now available directly through *Dialog*. Combined with the comprehensive patent and trademark information on *Dialog*, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in the following patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need.

Thomson File Histories are available from the following *Dialog* databases:

- CLAIMS/Current Patent Legal Status (File 123)
- CLAIMS/U.S. Patents (File 340)
- Chinese Patent Abstracts in English (File 344)
- Derwent Patents Citation Index (File 342)
- Derwent World Patents Index (for users in Japan) (File 352)
- Derwent World Patents Index First View (File 331)
- Derwent World Patents Index (File 351)
- Derwent World Patents Index (File 350)
- Ei EnCompassPat (File 353)
- European Patents Fulltext (File 348)
- French Patents (File 371)
- German Patents Fulltext (File 324)
- IMS Patent Focus (File 447, 947)
- INPADOC/Family and Legal Status (File 345)
- JAPIO - Patent Abstracts of Japan (File 347)
- LitAlert (File 670)
- U.S. Patents Fulltext (1971-1975) (File 652)

- U.S. Patents Fulltext (1976-present) (File 654)
- WIPO/PCT Patents Fulltext (File 349)
- TRADEMARKSCAN - U.S. Federal (File 226)

DialogLink 5 Release Notes

New features available in the latest release of DialogLink 5 (August 2006)

- Ability to resize images for easier incorporation into DialogLink Reports
- New settings allow users to be prompted to save Dialog search sessions in the format of their choice (Microsoft Word, RTF, PDF, HTML, or TEXT)
- Ability to set up Dialog Alerts by Chemical Structures and the addition of Index Chemicus as a structure searchable database
- Support for connections to STN Germany and STN Japan services

*** ANNOUNCEMENTS ***

"Thomson File Histories" are now available directly through Dialog in selected patent and trademark files. Combined with the comprehensive patent and trademark information on Dialog, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in one of the patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need. See HELP FILEHIST for more information about how to use the link and a list of files that contain the link.

The 2006 ENTREE Thesaurus has been added to EMBASE (Files 72, 73, 772, and 972)

RESUMED UPDATING

***File 120, U.S. Copyrights

e-Auction announces launch of EuroNet Flower Portal linking US \$2.48 billion trading community

CANADA NEWSWIRE

August 26, 1999

Linking 11 SCS Systems forms one of the world's largest
e-commerce portals

LONDON, UK, Aug. 26 /CNW/ - e-Auction Global Trading Inc. ('e-Auction', NASDAQ OTC: EAUC) today announced the introduction of their 'EuroNet Flower Portal' to Schelfhout Computer Systemen N.V.'s ('SCS') existing auction clients within the European Economic Community (EEC). By confirming credit-worthiness and executing payment, these 11 standalone SCS systems - currently conducting US \$2.48 billion in annual trade - can be linked

through EuroNet to create Europe's first pan-European flower market.

The first \$250 million of annual trade volume will be launched on the EuroNet Flower Portal in the fourth calendar quarter of 1999, with the rest of the network being scaled up in the first six months of 2000. e-Auction will be able to reduce the annual financial services costs on the first \$250 million of international trade from over \$20 million (approx. 8%) currently charged by banks to between \$7.5 and \$12.5 million. For the 11 initial customers on the network (\$2.48 billion annual trade), lowering settlement costs to 1-2% and foreign exchange to 2-3% of trade will reduce buyers' annual cost of financial services from approximately \$200 million to between \$75 and \$125 million charged by e-Auction.

'The EuroNet Flower Portal will allow SCS's customers to dramatically reduce the costs involved with financial settlement and foreign exchange,' commented David Hackett, Chief Financial Officer of e-Auction Global Trading Inc. 'By linking these international auctions and providing

settlement and foreign exchange services, e-Auction will help growers and buyers create a more efficient market that is easy for growers and buyers to use."

Currently, standalone auction houses perform credit checks and receive letters of credit for each buyer. The buyer, in turn, must repeat the process with each auction house they deal with. e-Auction has eliminated these redundancies by implementing a centralized financial settlement solution. This solution makes it possible for a remote buyer to participate in the auctions in their own currency, while the auction house and producers are paid in their **local currency**.

Auction houses running SCS's standalone systems will be able to access the basic EuroNet services free of charge by interfacing their auction clock system with EuroNet. Even though a small upgrading fee may be required to upgrade older systems, these costs can be financed through various government assistance programs and are not expected to be significant.

Once networks have been established with SCS's existing customers, and a critical mass exists, e-Auction plans to extend the EuroNet's capabilities to the remaining flower auctions in Europe and other globally oriented market players in North and South America and the Pacific Rim.

e-Auction Global Trading Inc.

e-Auction combines real time, electronic auction systems with integrated financial services including foreign exchange, hedging and financial settlement services. These are vital components to the overall auction process, and allow e-Auction to benefit from multiple revenue streams. e-Auction provides unprecedented value added services to auction houses, buyers and sellers in all industries that conduct commodity based trading, resulting in new markets, lower costs and more efficient cost saving transactions for all parties.

As a leader in providing B2B auction solutions, e-Auction is involved in the largest market segment of Internet auctions. According to Forrester Research Inc., it is estimated that by 2002 \$52.6 billion in transactions will be conducted through B2B auctions. This value dwarfs the expected \$7.5 billion business-to-consumer (B2C) market and the \$4.8 billion person-to-person (P2P) market where companies such as **eBay** (NASDAQ: **EBAY**), Onsale (Nasdaq:ONSL) and Amazon.com (NASDAQ: AMZN) target their services.

For more information on e-Auction please visit the web site at <http://www.eauctioninc.com>.

Going, going, virtually gone: The success of online auctions in the US such as eBay has prompted the rise of European auctioneers who want to emulate its model

BUSINESS AND FINANCE

June 17, 1999

In another crude but effective mirror of the physical world, virtual online auctions have become a steadfast feature in the world of hi-tech chic. Auction sites such as **eBay** are now peddling every conceivable item from Van Gogh paintings and antiques to cars and computers and the trade has rapidly become a big business. Forrester Research estimates that the total value of online auctions will grow from US dollars 1.4bn last year to US dollars 19bn in 2003.

Being the most dominant of online auction sites, **eBay** recently reported that its first quarter profit from operations rose to US dollars 7m from US dollars 569,000 a year earlier. Revenues rose from US dollars 6m to US dollars 34m, outperforming analysts' estimates of around US dollars 25m. The company also unveiled plans to acquire Butterfield & Butterfield Auctioneers for US dollars 260m in order to add high-priced art and collectables to its portfolio. **eBay's** number of registered users rose to 3.8 million this year, compared with 2.1 million last year.

Irish Head Euro Challenge

An Irish-based company, BidnBuy claims to be among the first European Internet auctioneers to pick up the gauntlet and challenge **eBay**. Says Aidan O'Grady, 'We aim to be the **eBay** of Europe.' The Dublin-based company already has more than 7,000 regular customers and

sells to people worldwide in more than 166 different currencies, which, O'Grady says, contrasts with eBay's solely dollar-based trading.

However, the success of online auction sites might soon be marred by a growing spate of online scams and frauds. Earlier this year an online merchant in Florida was convicted of wire fraud. He used eBay and Up4Sale to advertise new and used computers, attracting bids of as much as US dollars 2,700 each. He never delivered the goods or offered refunds. In another case, a 13 year-old Canadian boy placed US dollars 3.1m worth of bids on merchandise advertised on eBay. Among the bids were US dollars 24,500 for a red corvette convertible, US dollars 500,000 for a Van Gogh painting and US dollars 1.2m for a medical office in Florida. He was only discovered

when his parents received a phone call from Internet Auction House to discuss a US dollars 900,000 transaction the boy agreed to for an antique bed said to have once belonged to Canada's first prime minister.

Market Rising Steadily

However, despite the potential for fraud and false bids, online auction houses soldier on and the market rises steadily upwards. In the US, regulators and consumer advocates are taking a wait-and-see approach to regulating Internet ecommerce.

However, as online auctioneering is still new to Europe, it will be interesting to see what happens. Aidan O'Grady of BidnBuy explains that the company entered the online auctioneering market two years ago as a retailer of computer products and peripherals, offering bidders deals on products 24 hours a day. The company followed up the success of BidnBuy (www.bidnbuy.com) with the launch of its Buyer2Seller site (<http://b2s.bidnbuy.com>), a community-style online auction site which facilitates the interaction of buyers and sellers in trading a range of goods cars, electronics, antiques, clothes, jewellery and property - for auction for free.

Creating An Open Marketplace

'We wanted to get into the area of dynamic websites with participation from people as opposed to static sites that seemed to, and in many places still do, dominate the Internet', O'Grady says. 'Buyer2Seller functions as an open marketplace for people to sell goods themselves. Creating a medium for anybody to put their goods up for auction.'

O'Grady's colleague Aislin O'Moore recalls 'Buyer2Seller has only been up for the past few weeks and within our first week we had someone wanting to sell a house.'

Guarding against cyber fraud on auction sites is difficult, but

BidnBuy have implemented a grading system whereby existing traders qualify over time. On the Buyer2Seller website prospective buyers can recognise online the level of reliability a trader would have reached. Unlike the BidnBuy site, payments for goods on Buyer2Seller are not conducted online by credit card. 'At the end of auctions we send emails out to successful bidders and to sellers to let them know the stage of the auction. At that stage it is up to the buyer and the seller to contact each other by email.'

According to O'Grady, many of the dominant auction sites are US-focused, leaving plenty of room for aspiring European e'tailers to get in on the action. 'We have sold products in the US, China and Australia,

but our top markets at the moment are the UK, the US and then Ireland.'

Company that Runs Itself

The administration behind BidnBuy's websites is database driven to cover multiple product types and more than 166 currencies. BidnBuy's six employees liaise at the company's city-centre headquarters where the servers are based, but otherwise can work with each other remotely from their homes. 'The technology built around it is so strong that it basically runs itself', says O'Grady.

In terms of online marketing, the company has registered the site with more than 400 online search engines, specialist index sites and directories. 'We hope to develop it to be better than eBay's site, to target a global market, whereas eBay would target a predominantly American market. Some of the features we've included are dual currency meters so that a visitor from Japan would obtain a matching price in Yen. Currency conversions can be customised to a particular user. If you logged in from Ireland, your default currency would be the Punt. Anywhere an approximate dollar value is displayed, a visitor's local currency would be displayed beside it', says O'Grady.

However, despite the global coverage, O'Grady believes that European punters are not yet as keen as US buyers to purchase online. 'There's a definite hesitance, but over time that will change.'

e-Auction announces launch of EuroNet Flower Portal linking US \$2.48 billion trading community

CANADA NEWSWIRE

August 26, 1999

Linking 11 SCS Systems forms one of the world's largest
e-commerce portals

LONDON, UK, Aug. 26 /CNW/ - e-Auction Global Trading Inc. ('e-Auction', NASDAQ OTC: EAUC) today announced the introduction of their 'EuroNet Flower

Portal' to Schelfhout Computer Systemen N.V.'s ('SCS') existing auction clients within the European Economic Community (EEC). By confirming credit-worthiness and executing payment, these 11 standalone SCS systems - currently conducting US \$2.48 billion in annual trade - can be linked through EuroNet to create Europe's first pan-European flower market.

The first \$250 million of annual trade volume will be launched on the EuroNet Flower Portal in the fourth calendar quarter of 1999, with the rest of the network being scaled up in the first six months of 2000. e-Auction will be able to reduce the annual financial services costs on the first \$250 million of international trade from over \$20 million (approx. 8%) currently charged by banks to between \$7.5 and \$12.5 million. For the 11 initial customers on the network (\$2.48 billion annual trade), lowering settlement costs to 1-2% and foreign exchange to 2-3% of trade will reduce buyers' annual cost of financial services from approximately \$200 million to between \$75 and \$125 million charged by e-Auction.

"The EuroNet Flower Portal will allow SCS's customers to dramatically reduce the costs involved with financial settlement and foreign exchange," commented David Hackett, Chief Financial Officer of e-Auction Global Trading Inc. "By linking these international auctions and providing settlement and foreign exchange services, e-Auction will help growers and buyers create a more efficient market that is easy for growers and buyers to use."

Currently, standalone auction houses perform credit checks and receive letters of credit for each buyer. The buyer, in turn, must repeat the process with each auction house they deal with. e-Auction has eliminated these redundancies by implementing a centralized financial settlement solution. This solution makes it possible for a remote buyer to participate in the auctions in their **own currency**, while the auction house and producers are paid in their **local currency**.

Auction houses running SCS's standalone systems will be able to access the basic EuroNet services free of charge by interfacing their auction clock system with EuroNet. Even though a small upgrading fee may be required to upgrade older systems, these costs can be financed through various government assistance programs and are not expected to be significant.

Once networks have been established with SCS's existing customers, and a critical mass exists, e-Auction plans to extend the EuroNet's capabilities to the remaining flower auctions in Europe and other globally oriented market players in North and South America and the Pacific Rim.

e-Auction Global Trading Inc.

e-Auction combines real time, electronic auction systems with integrated financial services including foreign exchange, hedging and financial settlement services. These are vital components to the overall auction process, and allow e-Auction to benefit from multiple revenue streams. e-Auction provides unprecedented value added services to auction houses, buyers and sellers in all industries that conduct commodity based trading, resulting in new markets, lower costs and more efficient cost saving transactions for all parties.

As a leader in providing B2B auction solutions, e-Auction is involved in the largest market segment of Internet auctions. According to Forrester

Research Inc., it is estimated that by 2002 \$52.6 billion in transactions will be conducted through B2B auctions. This value dwarfs the expected \$7.5 billion business-to-consumer (B2C) market and the \$4.8 billion person-to-person (P2P) market where companies such as **eBay** (NASDAQ: **EBAY**), Onsale (Nasdaq:ONSL) and Amazon.com (NASDAQ: AMZN) target their services.

For more information on e-Auction please visit the web site at <http://www.eauctioninc.com>.

U.S. Online Toy Seller Enters British Market

Sorcha Niheilidhe

KRTBN KNIGHT-RIDDER TRIBUNE BUSINESS NEWS (BUSINESS PRESS - ONTARIO, CALIFORNIA)

December 06, 1999

E-commerce a la USA reached Britain last week as eToys.com launched a local version of its online retail store. The move is undoubtedly informed by the

need for companies to look beyond the indigenous U.S. market and recognize the growing global online community.

Going global is not just about getting first mover advantage and being ahead of the pack. It is increasingly becoming imperative to the success of any major e-commerce site.

Just as the early Web start-ups -- eToys, eBay, Amazon, CDNow -- in the United States recognized opportunity and blew their behemoth predecessors out of the cyber water, non-U.S. brands are fast emerging in local markets around the world. Where they miss out on Internet business savvy, they gain on intricate knowledge of local markets and culture.

U.S. companies need to flex their tongue muscles and start communicating with the international audience if they wish to remain king of the castle.

For most companies, going global is a daunting not to mention expensive prospect. However, given the fact that 60 percent of the online population will reside outside of the United States and 50 percent of Internet sales will be made outside the United States by 2003, the option of staying local is not realistic. The Internet is a global medium, and any company aspiring to be an e-commerce player must globalize.

Globalization is a lot more than translation. It's an art form. A toy company setting up in the UK, for example, must have local warehousing space and knowledge of **local currency** laws, business practices, marketing ethics, public relations procedures and advertising standards.

Throughout the world, people prefer if you speak to them and communicate with them in their own language. Consumers equally react better to sites which are localized to the degree that they accurately reflect the culture of the country.

Translating one language into another is not adequate. You might say tom-AY-to, but I say tom-AH-to.

While the Internet does allow a business to advertise to and even sell to a global market, it does not deliver products, assuage consumer concerns, understand local cultural nuances or speak different languages. People do.

A quick comparative look at the list of favorite toys on eToys.com and those on eToys.co.uk reveals a subtle and implicit knowledge of both cultures.

Thomas the Tank Engine, a very popular British cartoon character, enjoys center stage on dot.uk and only a cursory profile on dot.com.

It's a subtle difference, but in a multibillion-dollar market it is differences such as these that will ultimately separate the mutton from the lamb.

Sorcha Ni hEilidhe is an editorial writer for Nua Ltd. in Dublin, Ireland.

Wells Fargo Helps Build Multicurrency Product.(Company Business and Marketing)

Nelson, Kristi

Bank Systems + Technology , v 36 , n 6 , p 46

June , 1999

Text:

Wells Fargo, San Francisco, aims to position itself as a leader in global Internet payment processing.

One of the first banks to make acceptance of payment by credit card over the Internet available to merchants, Wells Fargo handles payment processing for about 3,000 on-line merchants, such as **eBay** and **eToys**. And recently the \$202 billion institution partnered with One Galaxy Solution, a subsidiary of the giant Mitsubishi Corp., to develop a Web site for software publishers that lets customers worldwide price and buy computer software titles in their **local currency**.

The Web site (www.bstore.com) is the first U.S. e-commerce site that can process credit card payments in multiple currencies for the international market, according to the two companies.

One Galaxy was looking for banks interested in working with it to support credit-card payment processing in **local currencies**.

"Supporting multiple foreign currencies for credit payment was a very difficult piece, involving redesigning the whole e-commerce system," said Ichiro Takano, president and chief executive officer of One Galaxy. After hearing from other banks that it couldn't be done, the company began working with Wells Fargo.

Though bank executives declined to discuss the technology, the process is straightforward. Prices on the One Galaxy site are listed in the **local currency**, rather than in U.S. dollars. Once a customer has submitted credit-card payment information, it is transmitted to Wells Fargo, which then checks with the bank that issued the customer's credit card for funds verification and authorization.

Once approved, the bank simultaneously settles the transaction with the cardholder's account in his or her **local currency** and with the One Galaxy Marketplace in U.S. dollars, at the established exchange rate for that particular day and time period.

One Galaxy initially is targeting consumers in the United Kingdom and Japan, but it plans to add Germany, Scandinavia and Australia this year.

Europe is the second-largest market outside the United States in terms of Internet services spending. Research firm International Data Corp. has estimated that the European market for Internet spending will grow from \$826 million in 1997 to \$10.8 billion in 2002. Japan has the next-largest market share and is expected to be one of the fastest-growing nations, with a Web services market slated to reach \$4.6 billion over that time period.

A Wells Fargo spokesman said the bank's merchant clients have found that a rising number of foreign consumers are interested in making purchases at commerce-enabled Web sites, and the new multicurrency product gives Wells Fargo another way to support the growth of e-commerce worldwide.

"Instead of switching back and forth from yen to dollars, or pounds to dollars, (customers) can concentrate on what's important to them," Tim Knowlton, vice president of business development for Wells Fargo's E-Commerce/Future Payments division, said in a statement. "When you make it

easier for customers to buy, they'll keep coming back."

Ecorp Brings EBay To Australia & New Zealand 10/17/99 >BY Adam Creed.

Newsbytes , NA

Oct 18 , 1999

Text:

SYDNEY, AUSTRALIA, 1999 OCT 17 (NB) Newsbytes. Australian Internet company ecorp Ltd (AUS:ECP) has opened the doors to **eBay** Australia & New

Zealand, a localized version of the world's largest person-to-person online selling and buying community developed by US-based **eBay** Inc. (NASDAQ:**EBAY**).

The new trading site, at <http://www.ebay.com.au>, is a joint venture between **ecorp** and **eBay**. It will contain local listings and categories, trading in **local currency**, as well as access to the main **eBay** community and its listings from around the world.

"With the strong platform provided by **eBay** Inc and its track record of performance in the United States, coupled with the marketing opportunities available to **ecorp**, we believe **eBay A&NZ** is well positioned to become the leading person-to-person trading site in Australia and New Zealand," said Daniel Petre, executive chairman of **ecorp**.

Marketing opportunities Petre refers to include: exposure on **ninemsn** - its 50/50 joint venture with Microsoft Corp. (NASDAQ:MSFT) and one of Australia's most highly trafficked Websites; and access to exposure in traditional print and television media through **ecorp's** parent company Publishing & Broadcasting Ltd (AUS:PBL).

eBay Australia and New Zealand will compete with established Australian auction sites, including a local version of Yahoo! Auctions, **IBuy**, **Stuff and Sold.com.au** - a joint venture by another large Australian media group **John Fairfax Holdings Ltd.** (AUS:FXJ) with US-based **Classified Ventures Inc.**

Act Globally, Think Locally.(Industry Trend or Event)

Wilson, Tim

InternetWeek, 1

Nov 15, 1999

Text:

A U.S. catalog retailer expands its Web commerce presence in Europe. An online auctioneer offers special programs in 53 U.S. metropolitan areas to move big-ticket items that don't sell well on its global site. A West Coast financial institution taps the Web to sell home equity loans nationwide for the first time, doubling such sales in the first month.

All these companies are trading on the new Internet geography, which lets local businesses go global overnight and forces some global companies to reassess their regional marketing and IT strategies.

But extending your reach doesn't necessarily expand your business. The key to success, say e-businesses and analysts, is tailored products and site content. Outside the United States, that also means doing business in local languages, and billing and settling transactions in **local currencies**, according to **local** regulations.

"It might sound contradictory, but a successful global e-commerce strategy will involve thinking locally in each of the individual markets," said Anna Giraldo-Kerr, an analyst with International Data Corp. "Companies are finding that the cookie-cutter approach does not work."

Most online sales are now in the United States, but that demographic is changing, particularly in the business-to-consumer market, according to IDC. Online spending in Western Europe, which stood at \$5.6 billion in 1998, will increase 138 percent a year to reach \$430 billion by 2003, the firm projects. Online spending in the Asia-Pacific region (excluding Japan) will quadruple, to more than \$81 billion by 2003, IDC said. U.S. spending, in comparison, will grow 80 percent a year, to \$708 billion.

Nearly every company that sells on the Web, regardless of size, is extending its reach. Even catalog retailer Lands' End, which already has customers in 160 countries, is intent on carving out a bigger slice in targeted markets abroad.

"Every day that our site is not up and running in the customer's local language, we're losing business," said Bill Bass, vice president of e-commerce at Lands' End, which last week launched Web sites aimed at the German and U.K. markets. "The customers' experience is materially better if they can shop in their own language and if the content they see fits with their specific wants and needs."

To that end, Lands' End is using a combination of home-grown tools and third-party services to translate Web content from the company's central site into languages and contexts that can be easily understood by users in each country it targets. Content on the company's IBM mainframe-based Web servers is tailored to each country, and customers can buy products in their **local currency**. Bass declined to identify the specific globalization services and software the company is using.

Lands' End is also adding nationally oriented versions of "Shop With a Friend," an interactive feature that lets Web customers work with Lands' End customer service representatives to choose and buy items. For instance,

a London-based customer is teamed online with a local service representative who better understands the culture, geography and buying habits of the British shopper.

The local language effort puts pressure on the Lands' End IT staff to swiftly adopt new multilingual technology and services, but the company doesn't plan to distribute its IT control across the different nations it serves, Bass said. "Running the Web site centrally allows you to upgrade systems faster in each country, because it all happens consistently from one location," he said. "You can't do that if your IT functions are decentralized."

Lands' End doesn't localize its U.S. content, largely because its customers' behavior and tastes don't differ widely from region to region, Bass said.

Buying Patterns

Another major e-business, online auctioneer **eBay**, has identified significant differences in regional buying patterns. That's the impetus for the company's plan to offer regional auctions in 53 U.S. metropolitan areas, as well as four non-U.S. countries, by the end of next year.

"Shipping costs are a big obstacle for selling larger items, such as cars, pinball machines and that sort of thing," said Reed Maltzman, director of regional marketing at **eBay**. "If you're buying a baby grand piano, geography makes a big difference."

Like Lands' End, **eBay** is keeping its IT infrastructure and administration centralized, but it's parsing the site so that local sellers can reach local buyers through a function called "Go Local." Listings on the local auctions also appear on the site's national auctions. "We're not going to build out our IT systems locally," said Maltzman. "The regional auctions use the same tools, the same database engine as our global exchange."

But, like Lands' End, **eBay** also cultivates local communities of interest to grow its business. "In U.S. communities, we send people to trade shows, advertise locally, that sort of thing," he said. "In countries like Germany and Australia, we maintain a physical presence to help us understand the particular needs of those communities and to make sure the categories of the things we are listing are right."

But doing business online in disparate national markets isn't easy, IDC's Giraldo-Kerr said. There are not only language and currency challenges to deal with, but also those of payment. "Germany is a mail-order society, but almost no one there pays by credit card," she said. "Amazon.com has received some payments from Eastern Europe in boxes of cash currency, because there is no infrastructure for electronic payment there."

Several vendors offer software and services designed to help companies deal with currency exchange, tax calculation and language translation (see story, page 18).

Some companies are surprised by the amount of traffic they receive from international customers as soon as they go live on the Web, said Don DePalma, vice president of marketing at Idiom Inc., a vendor of globalization software tools. "Most of the dotcoms are global from day one. Once you're on the Web, you're global whether you like it or not," he said. "The trouble is that a lot of them are not prepared to serve local

markets."

While many companies are struggling to localize their products and services, many local companies endeavor to serve ever-larger national and global markets. Wells Fargo, for example, last month started using the Web to sell home equity lines of credit to customers in the eastern and southern United States--regions where its services weren't available before.

But despite the fact that Wells Fargo has doubled its volume of home equity loans, the bank has no plans to abandon its branches and become another Wingspan.

com, said Colin Walsh, senior vice president of home equity services. "We want to be able to serve the customer by as many methods as possible--in the branch, on the telephone or online," Walsh said.

From an IT perspective, the group offering home equity loans nationally shares infrastructure with Norwest Mortgage, Wells Fargo's nationwide mortgage arm. Although the loan service will have some dedicated resources, such as customer service representatives and call center technology, the infrastructure will be centralized and shared, Walsh said.

Wells Fargo does tailor its offerings to the user's locality, partly because of variations in loan regulations between states and partly because of differences in demand. For example, Texas only recently repealed its laws against borrowing money with a primary residence as collateral. As a result, Walsh explained, Texans remain hesitant to take out home equity lines of credit, and Wells Fargo has had to modify its Web content to help persuade that specific audience.

In addition, Wells Fargo has to exercise some prudent risk management. Some regions may fall into hard financial times, making residents a poor credit risk, Walsh said. But Wells Fargo can't change its rates once customers have locked them in, so the company must stay alert to shifting regional economies, he said.

For now, however, Wells Fargo has no plans to expand its banking and financial services overseas. "We have enough to do in expanding our brand to places like South Carolina, where the people don't have a banking relationship with us, and they aren't necessarily familiar with our services," Walsh said. "We're under a lot of pressure in those areas, because we're just one click away from our competitors."

Significant Pressure

Harbor Freight Tools is reaching out to more customers over the Web. Harbor Freight, which sells hand and power tools from 70 retail sites across the western United States, also lists between 7,000 and 8,000 items on its global Web site. Officials declined to say how much of the private company's sales come from its site, but they did say it receives about 9 million hits a month and is the fastest growing part of the Harbor Freight business.

Like Wells Fargo, Harbor Freight sees the Web as just one prong of its expansion strategy. The company still does a brisk catalog and store business.

"We don't think our Web presence takes away from our retail or catalog businesses at all," said Dave Martel, vice president of marketing at Harbor Freight. "In fact, our site does just as well in the areas where we have a physical presence as it does in areas where we don't."

But the company's e-commerce effort adds pressure on Harbor Freight's IT operations, said Rob Rastovich, Web developer at the retailer. "With customers coming in from a wider range, we know we have to keep the site up and running," he said. "We haven't had to hire any new people, but we have had to get smart on firewalls and some of the network infrastructure issues that are important when you're doing business online."

Unlike some companies that sell online through new departments or separate entities, Harbor Freight decided not to separate its online operation from the main business, Martel said. "The Internet, for us, is basically direct marketing on steroids," he said. "We don't see it as being all that different from our retail or catalog businesses."

But for the smallest businesses, e-commerce is creating huge high and low swings. Nowhere are those swings more evident than in the collectibles business, where free Web sites and online auction systems have turned every collector into a seller.

For example, the InterNet's Baseball Card Store, one of the first consumer auction sites on the Web, burst out of the blocks by automating the in-person auctions it used to hold in its San Diego retail store, said Joe Juhasz, founder of the trading card site. At the beginning, it auctioned about 300 items a month. Now it's auctioning about 7,000 items a week-everything from 1930s tobacco cards to bobbing-head dolls. The company now operates entirely online, serving customers all over the country and even abroad.

But the online boom also led to something of a bust for the InterNet's Baseball Card Store. "When

eBay made its big push a couple of years ago, our business dropped about 70 percent," Juhasz said. "We're doing better now, but we find that we have to do things to differentiate ourselves, like offering a frequent bidders program."

Like many small online businesses, the InterNet's Baseball Card Store contracts with a Web hosting provider for 24-hour service. The company's three employees occasionally work early and late hours to answer e-mails, but customer support isn't a big problem, according to Juhasz. "We're not selling anything that people have to have right now," he said.

Whether an e-commerce executive works for the smallest online company or the largest, virtually everyone agrees that the key to penetrating new markets-local or international-is brand recognition.

"It requires size and scale to be able to compete regionally,"

eBay's Maltzman said. "In our San Francisco area auction, we're listing about 30,000 items. That exceeds the total items listed by most of our competitors on their global sites. There are about 500 auction sites out there now. There's no shortage of competitors. But it's hard for them to compete when they list only a fraction of the items we do."

eBay's well-known name, as well as its regional marketing efforts, causes many sellers to move merchandise directly onto **eBay** without even considering the other auction sites, he said.

Building brand recognition in new regional markets requires establishing some sort of local presence, even if it's just with advertising or a sales office, said Wells Fargo's Walsh. "You trade on the

customer's perception of your business," he said. "If you don't have that perception, it's difficult to bring in new customers."

jBusiness Means Business.(Novera Software Java development environment)(Software Review)(Evaluation)

Feb 16 , 1999

Word Count: 2442 **Line Count:** 00203

Company Names: Novera Software Inc.--Products

Descriptors: Java; Application development software; Software single product review; Internet/Web server software

Product/Industry Names: 7372422 (DBMS Utilities); 7372513 (Application Development Software); 7372682

(Internet Server Software)

SIC Codes: 7372 Prepackaged software

NAICS Codes: 51121 Software Publishers

Trade Names: Novera JBusiness 4.0 (Internet/Web server software)--Evaluation

File Segment: CD File 275

18/8/5 (Item 2 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01979903 **Supplier Number:** 18671108 (Use Format 7 Or 9 For FULL TEXT)

Under the hood. (Technology Tutorial)(Tutorial)

Oct , 1996

Word Count: 4236 **Line Count:** 00328

Special Features: illustration; program

Descriptors: Programming Tutorial; C Programming Language

File Segment: CD File 275

18/8/6 (Item 3 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01804827 **Supplier Number:** 17155740 (Use Format 7 Or 9 For FULL TEXT)

Tools and utilities.(1995 Database Buyer's Guide and client/server sourcebook)(Buyers Guide)

May 15 , 1995

Word Count: 45154 **Line Count:** 03869

Descriptors: Software Buyers' Guide; Application Development Software; DBMS Utility; CASE Software;

Database Design; Modeling; Disk Formatting Utility; File Maintenance Utility; CAD Software; Help File Generator;

Printer Support Software; Query Processing; Report Generation Software

SIC Codes: 7372 Prepackaged software

File Segment: CD File 275

18/8/7 (Item 4 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01708288 **Supplier Number:** 16197486 (Use Format 7 Or 9 For FULL TEXT)

OpenVMS AXP I/O concepts: software. (the second in a series of articles on the OpenVMS AXP I/O subsystem) (Tutorial)

July-August , 1994

Word Count: 5057 **Line Count:** 00412

Special Features: illustration; chart; program

Descriptors: I/O Management; Operating System; Software Design; Enhancements; Tutorial

SIC Codes: 7372 Prepackaged software

Trade Names: OpenVMS AXP (Operating system)--Design and construction

File Segment: CD File 275

18/8/8 (Item 5 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01688545 **Supplier Number:** 15356060 (Use Format 7 Or 9 For FULL TEXT)

Tools and utilities. (1994 Database Buyer's Guide and Client/Server Sourcebook) (Buyers Guide)

June 15 , 1994

Word Count: 46074 **Line Count:** 03903

Descriptors: Software Selection; DBMS; Desktop Utility; Application Development Software ; Client/Server Architecture; Guidelines; Directories

SIC Codes: 7372 Prepackaged software

File Segment: CD File 275

18/8/9 (Item 6 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01674583 **Supplier Number:** 15035007 (Use Format 7 Or 9 For FULL TEXT)

ROMLDR, an embedded system program locator. (modifying a program from MS-DOS EXE format to a located binary file format) (includes related articles on coding for embedded applications and startup code for embedded systems) (Tutorial)

March , 1994

Word Count: 4988 **Line Count:** 00442

Special Features: illustration; table; program

Descriptors: Program Development Techniques; Compiler; Embedded Systems; EPROM; Tutorial

Trade Names: MS-DOS (Operating system)--Programming

File Segment: CD File 275

18/8/10 (Item 7 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01636589 **Supplier Number:** 14638707 (Use Format 7 Or 9 For FULL TEXT)

Windows questions & answers. (question-and-answer) (Column)

Dec , 1993

Word Count: 2239 **Line Count:** 00180

Special Features: illustration; program; table

File Segment: CD File 275

18/8/11 (Item 8 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01613921 **Supplier Number:** 13901763 (Use Format 7 Or 9 For FULL TEXT)

Tools and utilities. (software packages that help database developers prototype and design applications, query, and create help systems, among other uses) (1993 Database Buyer's Guide Special Issue) (Buyers Guide)

June 15 , 1993

Word Count: 45702 **Line Count:** 03876

Descriptors: DBMS; Applications Programming; Application Development Software; Directories; Computer Software Industry; Disk/Tape File Utilities; Program Testing Software; Documentation; Screen Generators/Formatters; Computer-Aided Software Engineering; File Format Conversion Software; File Transfer; Desktop Utility; Program Editor; Disk/File Management Software; Online Help File; Program Library; Query Processing; Report Generation Software

SIC Codes: 7372 Prepackaged software

File Segment: CD File 275

18/8/12 (Item 9 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01316593 **Supplier Number:** 07731796 (Use Format 7 Or 9 For FULL TEXT)

DOS profilers. (Software Review) (The Profiler v. 2.04, Personal Measure v. 1.0, Inside! v. 2.0, High Resolution Timer v. 2.0r) (evaluation)

Oct , 1989

Word Count: 2374 **Line Count:** 00176

Company Names: Spirit of Performance Inc.--Products; Paradigm Systems Inc.--Products; Ryle Design--Products; DWB Associates Inc.--Products

Descriptors: Application Development Software; Evaluation

SIC Codes: 7372 Prepackaged software

Trade Names: The Profiler 2.04 (Program development software)--Evaluation; Personal Measure (Program development software)--Evaluation; Inside! 2.0 (Program development software)--Evaluation; High Resolution Timer 2.0r (Program development software)--Evaluation

File Segment: CD File 275

18/8/13 (Item 10 from file: 275)

Gale Group Computer DB(TM)

(c) 2008 The Gale Group. All rights reserved.

01293871 **Supplier Number:** 07178042 (Use Format 7 Or 9 For FULL TEXT)

Uniting file systems; experimental large-scale, distributed file systems are now being created. (includes related article on the history of the AFS Project)

March , 1989

Word Count: 5691 **Line Count:** 00449

Special Features: illustration; chart

Descriptors: Carnegie-Mellon University. Information Technology Center; Wide Area Networks; Distributed Database; Disk/File Management Software; System Design; System Development; Requirements Analysis; Case Study

File Segment: CD File 275

18/8/14 (Item 1 from file: 16)

Gale Group PROMT(R)
